

LIGHTWEIGHT AIR COMPRESSORS

for aircraft—

engine starting, operating air-brakes, sirens, etc. They are arranged to cut out automatically, and run idle when the receiver pressure reaches a predetermined value.

Above is shown the single-cylinder model, which weighs only 4½ lb. and has a piston displacement of 0.368 cubic feet of free air per minute at 1,200 R.P.M.

Power consumed : 0.175 H.P. at 200 lb. per square inch pressure

The two-cylinder model weighs 9 lb. and has double the capacity.

Made in the same factory as the well-known B T H MAGNETOS
